

**Date: January 1, 2026**

**Subject: Manufacturer's Declaration of Regulatory Compliance**  
– Confirmation of Cosmetic Status and Compliance for StériDERM Serums

To Whom It May Concern:

This letter serves to confirm that the following serums from Laboratoires StériDERM:

- StériDERM HyalPure Pro
- StériDERM Pro Rejuvenate
- StériDERM Pro Boost

are cosmetic products intended solely for topical use.

These products comply with applicable regulatory requirements in key markets, including:

- **European Union:** Regulated under Regulation (EC) No 1223/2009 on cosmetic products (as amended). We affirm compliance with applicable EU requirements, including safety assessment, good manufacturing practices (aligned with ISO 22716), product information file maintenance, and notification via the Cosmetic Products Notification Portal (CPNP) (where applicable).
- **United States:** Regulated under the Federal Food, Drug, and Cosmetic Act (FD&C Act), as amended by the Modernization of Cosmetics Regulation Act of 2022 (MoCRA). We affirm compliance with U.S. FDA requirements for cosmetics, including proper labeling, safety substantiation records, prohibitions against adulteration and misbranding, and facility registration/product listing (where applicable). We maintain records for adverse event reporting and safety substantiation. Please note that cosmetic product facility registration and product listing is neither a cosmetic approval program nor a promotional tool. Cosmetics are not subject to pre-market approval by the FDA (except for color additives), and the FDA does not issue formal certificates of compliance.

Should you have any questions or require additional information regarding this confirmation, we invite you to contact our team at Laboratoires StériDERM using the details below.

Sincerely,

Regulatory Compliance Manager
